Short CV:

1. Education and training

After finishing Science and Maths Secondary School she enrolled in the Faculty of Medicine at the University of Ljubljana in Slovenia. She completed a six-year study programme in 1995, and she obtained a title Doctor of Medicine (M.D.). She passed professional examination at the Ministry of Health of the Republic of Slovenia on 23 April 2006. In 1995 she entered postgraduate studies at the Faculty of Medicine in Ljubljana. She carried out her thesis research under the mentorship of professor Bojan Tršinar. She successfully defended her master's thesis entitled »*The Influence of Undescended Testicles on Men's Fertility*« and was awarded the title Master of Science.

She gained her specialization in gynaecology and obstetrics at the Faculty of Medicine in Ljubljana on 26 October 2001, and thus she became obstetrics and gynaecology specialist. In 2000 she obtained professor Nicolaides's licence in the field of obstetrics for early pregnancy ultrasound and nuchal translucency measurements. She has attended some practical courses: Kings College in London (Prof. Nicolaides, 2000), Vienna (VISUS course, 2005), and Berlin (Foetal Cardiography, 2006).

2. Work experience

In 1995 she started working as a junior doctor at the University Medical Centre in Ljubljana. In 1996, after she had gained her specialization in gynaecology and obstetrics, she got a job at the Postojna Maternity Hospital in Slovenia. While working at the Postojna Maternity Hospital she acquired a lot of practical knowledge from gynaecology and obstetrics in general, and then she started to specialize in ultrasound diagnostics. In 2008 she became employed by Dravlje Health Center, IVF Postojna, where she works today. IVF Centre in Postojna is the third biggest centre in Slovenia, and approximately 800 stimulated cycles are performed there annually. MSc Uršula Reš Muravec is a Medical Director of Dravlje Health Centre.

3. Publication and Research

She actively participates in congresses and courses in Slovenia and abroad. So far she has published a great deal of expert and scientific works (articles, books, posters) in Slovenia and elsewhere.

Her core scientific work represents ultrasound application in fertility diagnostics and treatment and in the field of obstetrics. She has been working with 3D/4D ultrasound machines since 1995, and in recent years she has attended many courses and also given some lectures in this field. The lectures have been organised by General Electrics - VISUS courses, Voluson. She has also published many works related to 3D/4D ultrasound

4. Professional Membership

Uršula Reš Muravec is a member of some Slovenian, European, and global associations: ESHRE (the European Society of Human Reproduction and Embryology), ISUOG (International Society of Ultrasound in Obstetrics and Gynaecology), and the Slovenian Society for Reproductive Medicine.
